

## Managing the risk of Infection within Dentistry

**For busy modern dentists the risk of infection and microbial contamination is a major concern. The number of procedures they perform, their complexity and the need for fast patient throughput places high demands on dentists, their equipment and clinics.**

Microbial contamination can originate almost anywhere; from direct mucosal contact between the patients, the dentist and the equipment to the production of aerosols containing biological material from ultrasonic scalers, air water sprays and even surgical procedures using high-velocity rotating instruments.

Pathogens such as Clostridium difficile and Mycobacterium tuberculosis Spores, MRSA, E. Coli, Staphylococcus aureus and Pseudomonas aeruginosa are all a worrying threat to staff and patients alike. Understanding basic microbiology is key to managing and preventing the transmission of harmful germs. Some pathogens can survive on surfaces for months so making sure your surgery is hygienically clean is of paramount importance.

STERI-7 XTRA with Reactive Barrier Technology is here to help BREAK the Chain of infection, TREAT the cause and PREVENT it's return.

For more information please contact us:

**USE DISINFECTANTS SAFELY - Always read the label and product information before use. Never Mix STERI-7 with other products or chemicals.**

# STERI-7

PROTECTION BETWEEN CLEANS

STERI-7 XTRA is a proven high-level hospital/surgical grade disinfectant cleaner, which provides fast, safe and effective decontamination of dental instruments and equipment. STERI-7 XTRA ensures a high-level hygienically clean environment between patient consultations and surgical procedures giving maximum safety and confidence.

Most importantly, STERI-7 XTRA uses Reactive Barrier Technology. This unique innovation allows STERI-7 XTRA to provide double protection against infection and contamination. When applied, it kills up to 99.9999% of the most commonly isolated microorganisms within seconds. At the same time, a reactive barrier is created that ensures that any germs subsequently introduced will also be killed just as effectively 24/7 - Protection Between Cleans.

With efficacy against a wide range of pathogenic, bacteria, spores and viruses, STERI-7 XTRA is available in a range of formats and sizes, as either ready to use high-level disinfectant cleaners and wipes or concentrates.

STERI-7 also produces a full range of surgical level Personal Care products, including a hypoallergenic surgical level Hand Wash and Hand Rub, catering for all sizes of dental practice / hospital / dental laboratory environment.

## BIOSECURITY

7th GENERATION LIQUID MICRO EMULSION POLYMERIC MATRIX DISINFECTANT CLEANER

REACTIVE BARRIER TECHNOLOGY PROTECTION BETWEEN CLEANS

ONE STAGE PROCESS

EASE OF USE

NON ALCOHOL

NON CORROSIVE

MULTI SURFACE TREATMENT

PERFECT BALANCE BETWEEN SAFETY AND EFFICACY

BROAD SPECTRUM

TESTED AND PROVEN IN THE REAL WORLD

RAPID KILL RATE up to 99.9999% IN SECONDS

BPR COMPLIANT
